

Press Release

Hörmann Logistik is expanding its AutoStore® Area

Hörmann Logistik is expanding its AutoStore® marketing area in Europe. Hörmann Logistik has received distribution rights for Austria, Switzerland and Eastern Europe from the AutoStore® headquarters in Norway in addition to the area in Germany. With this, the still expanding AutoStore® company confirms the successful partnership with the Munich intralogistics specialist. Hörmann Logistik has been the official distributor of the innovative AutoStore® small parts storage solution since 2013. Since then, numerous AutoStore® solutions have been implemented in a wide variety of industries. Hörmann Logistik is also the first AutoStore® partner to implement a system using the latest Black Line robot technology.

System control and management with the HiLIS AS Warehouse Management System

In over 30 years of company history, Hörmann Logistik has implemented a large number of intralogistics projects in various industries. Tailor-made high-bay warehouse for pallets or rolls, small parts and tray storage as well as the connecting conveyor technology and picking systems. Hörmann Logistik developed the efficient and powerful HiLIS AS especially for AutoStore®, based on its own warehouse management system HiLIS. It manages, controls and monitors all warehouse processes online. The individual coordination to the AutoStore® requirements ensures maximum transparency, system availability and performance.

Personnel support for the successful business area AutoStore®

For the latest expansion of the distribution area, the AutoStore® business area under the direction of Robert Heinz with Franz Stöger receives additional support. The sales professional based at the subsidiary KLATT Fördertechnik in Neumarkt am Wallersee, Austria, brings over 12 years of intralogistics experience at SSI Schäfer and consulting projects in business development and project management to the Hörmann logistics team.
