

Press release

Hörmann Intralogistics receives general contractor order for the construction of a new work-in-progress warehouse from Dunapack Packaging Straßwalchen.

Straßwalchen, Austria – Hörmann Intralogistics has been commissioned by Dunapack Packaging Straßwalchen, a leading supplier of corrugated board packaging and part of the Prinzhorn Group, as general contractor for the construction of a new two-aisle high-bay warehouse (HRL). The automated sheet goods warehouse is being built in Straßwalchen (Austria) and is intended to expand the company's storage capacities and thus significantly improve productivity and flexibility.

The project includes the turnkey construction of a high-bay warehouse in silo construction including state-of-the-art storage and conveyor technology. The core components include two high-performance two-mast storage and retrieval machines, which ensure an incoming goods output of 40 loading units per hour and an outgoing goods output capacity of 65 loading units per hour. In addition, the project includes conveyor technology for corrugated board formats, special shelf sprinkler systems and the HiLIS Warehouse Control System, which is responsible for warehouse management and material flow control within the high-bay warehouse. In addition, the HiLIS control technology and plant visualization modules are included.

The stacks of corrugated cardboard to be stored, which weigh up to 3,000 kg and are not strapped, require particularly gentle handling. This is ensured by the driving dynamics of the storage and retrieval machines, which greatly reduce vibration behaviour through stacker crane-specific travel curves and thus enable safe transport of the sensitive load. In addition, conveyors with wide plastic modular belts ensure a smooth transfer of the packages.

"With this project, we are significantly strengthening our production and logistics infrastructure. Hörmann Intralogistics convinced us with its comprehensive know-how in the corrugated board industry and the complete package of warehouse construction, conveyor technology and software, so that we are able to optimize our productivity, increase our flexibility by decoupling individual processes and significantly increase occupational safety through process optimization," explains Christoph Ludorff, Operations Manager at Dunapack Packaging Straßwalchen.

For Hörmann Intralogistics, this order is a continuation of the successful cooperation with leading companies in the packaging and corrugated board industry. Arno Lettmair, Sales Engineer at Hörmann Intralogistics, emphasizes: "We are very pleased that Dunapack relies on our expertise. Together with the HiLIS system, our layout will enable efficient and transparent warehouse management and thus make a decisive contribution to the automation of internal logistics processes."

The rack steel construction, as well as the roof and wall cladding of the warehouse, will also be implemented by Hörmann Intralogistics. Completion and commissioning of the warehouse are planned for the coming year.

About HÖRMANN Intralogistics:

HÖRMANN Intralogistics is a leading provider of innovative and tailor-made logistics solutions. With a comprehensive portfolio of services and technologies, the company supports its customers worldwide in optimizing their logistics processes and increasing their efficiency.

About Dunapack Packaging

Dunapack Packaging stands for innovative and competitive corrugated cardboard packaging solutions.

With more than 6,000 employees and a sales volume of around 3 billion m², the company is the market leader in Central and Eastern Europe, with 24 locations in 12 countries meeting the highest customer requirements. Dunapack Packaging is part of the Prinzhorn Group. With 10,000 employees in 16 countries, the Prinzhorn Group is a European market leader in the packaging, paper and recycling industry. With an annual turnover of 2.9 billion euros, the group is among the top 5 in Europe in this segment. The family-owned Prinzhorn Group is headquartered in Vienna, Austria, and is divided into three divisions: Dunapack Packaging (corrugated packaging solutions), Hamburger Containerboard (production of recycled corrugated base paper) and Hamburger Recycling Group (collection and trade of secondary raw materials).
